HOSPITAL INVENTORY FOR FINANCIAL REPORTING DEADLINES

Case Study: Healthcare – Cancer Hospital

A large cancer hospital provide innovative cancer treatment options across a UK network of centres. Consultants, specialists and staff provide an all-encompassing and personalised cancer care service. Treatments include proton beam therapy, radiotherapy, chemotherapy and immunotherapy, along with a range of supportive care services. The hospital also offers a rapid MR imaging diagnostic service at each centre, which patients can access to identify a range of medical conditions, not just cancer.

REQUIREMENT

The cancer hospital needed a **stocktaking solution to meet financial reporting deadlines,** as the current process was too labour intensive.

The cancer hospital required RGIS to provide the following:

- Experience within a **healthcare environment**
- **An alternative to pen and paper counts** completed by in-house staff previously
- **Quick, electronic data return** for financial reports
- **Experienced and trained auditors** to complete inventories

SOLUTION

The cancer hospital partnered with RGIS to complete the **stocktaking project**, and provided the following:

- All wards were contacted to **discuss preparation** prior to the stocktake
- All wards had a **specific time frame** of schedules to **work around patient needs**
- The experienced RGIS team created an enhanced base program for the customer that utilised **new inventory technologies**
- The process replaced the pen and paper counts and provided a **quick data return**
- **Knowledgeable and trained RGIS auditors** worked the inventory, adding **efficiency and accuracy**
- **Accurate data** was then returned electronically following the inventory

RESULTS

The cancer hospital found by outsourcing the **stocktaking project** to RGIS, the following results were achieved:

- The hospital was able to **meet the financial reporting deadlines** with ease
- **Consolidated data** was available for immediate use, after the event on a USB drive
- The customer reported **substantial cost savings**
- The new inventory program needed **less staff and fewer man-hours**

By partnering with RGIS, the cancer hospital found that **consolidated data was available for immediate use** after the event, which meant **financial reporting deadlines were met**

Hospital Stocktake   Information Gathering   Accurate Reports   Cost Saving
