ASSET DATA COLLECTION PROJECT

Case Study: Fixed Asset – Medical Billing Company

A medical billing company required support from RGIS to **complete an asset data collection** project in two large office buildings

RGIS

ASSET DATA COLLECTION PROJECT

Case Study: Fixed Asset – Medical Billing Company

A dynamic, progressive medical billing company with a dedicated team that offers over 25 years' experience in successfully providing streamlined billing and collection services. Offering the latest technology and billing best-practices to the healthcare sector.

REQUIREMENT

A medical billing company needed to complete an **asset data collection project** in two large office buildings. Without the staff or scanners to complete such a project, the medical billing company required RGIS to provide the following:

- To complete a **full asset inventory** for two large buildings, each with three floors
- **Total cost quotes** needed within one week of contact
- Provide an **experienced team with scanning equipment**
- Work to a **tight deadline**

SOLUTION

The medical billing company partnered with RGIS to complete the **asset data collection project**, and provided the following:

- **The quote, asset inventory event and data delivery** were all completed **within 30 days**
- RGIS created an **asset data collection program** that allowed for **verification and addition of assets**
- **Experienced, local teams** were deployed through the RGIS scheduling department
- Auditors found **detailed asset information** on new and existing assets

RESULTS

The medical billing company found that by outsourcing the **asset data collection project** to RGIS to complete, the following was achieved:

- Project **completed within 30 days** of initial contact
- **Existing asset register was updated** and new assets were added
- Due to the accurate work RGIS completed, the company was able to comply with the set requirements, and **maintained both the contract and reputation** as a full-service medical biller

By partnering with RGIS, the medical billing company had an **updated asset register** with new assets added, so had **full visibility of both location and quantity of assets**

Full Asset Count	Updated Asset Register	Accurate Data	Fast Turnaround
