

PHARMACEUTICAL LOGISTIC CENTRE COUNT

Case Study: Logistic Centre – Pharmaceutical Logistic Company

A pharmaceutical logistic company, required support from RGIS to **count stored stock** and stock within pick zones

PHARMACEUTICAL LOGISTIC CENTRE COUNT

Case Study: Logistic Centre – Pharmaceutical Logistic Company

A pharmaceutical company involved in distribution, with a fleet of vehicles providing a widespread and logistically functional distribution over the national territory, highly specialised in the large-scale retail trade required support from RGIS.

REQUIREMENT

The logistic company required a company with pharmaceutical stocktaking experience to count stock within pick zones and stored stock. Specific requirements were:

- **Complete stock count** within a one week time frame
- Count stock within **pick zones**
- Count stock within **storage areas** not within the pick zones
- Ensure all **high stock** was included and not missed

SOLUTION

The logistic company partnered with RGIS to complete the following:

- Allocated two teams of 10 **experienced RGIS auditors**
- One team for the day shift, and the other team worked through the night
- Platforms were rented in order to be able to count **stock at all levels** within the logistic centre

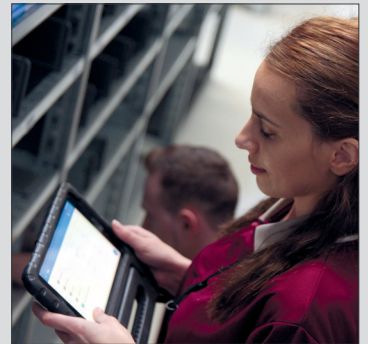

RESULTS

The logistic company found by outsourcing the logistic centre inventory project to RGIS, the following was achieved, to a high standard:

- **All stock was counted and verified**
- All **stock at height**, that had been previously missed, was included in the count
- The customer had a **complete picture of all stock**, in all locations
- The inventory project was completed with **no disruption to the customers' business**
- The full stock count was completed within the requested **one week time frame**

By partnering with RGIS, the pharmaceutical logistic company had a **complete picture of all stock, in all locations**
